***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest: an interlock/exclusion system having multiple gas flow units, wherein the system is arranged so that when any one of the gas flow units is opened the other gas flow units are prevented from opening. The interlock/exclusion system comprises multiple pivotable bars and intermediate pins located between and coupled to adjacent gas flow units. Once one gas flow unit is opened, a first pin pivots a first pivotable bar. The second end of the first pivotable bar prevents the opening of the second gas flow unit and causes a first coupling 48 (as shown in Figure 3) to pivot to cause a second pivotable bar to pivot which causes a third pin to prevent the opening of a third gas flow unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
